

Special Issue

Innovative Foods: The Future Food Supply, Nutrition and Health

Message from the Guest Editors

Feeding the growing world population is going to be a global food supply challenge for our existing food systems in the coming decades. Currently, food innovation and product development activities are heavily focused on new protein sources to provide alternative to animal-based foods. Allergenicity risk to public health from emerging protein sources such as insects, microalgae, cultured meats, and legumes would need to be managed as these foods are being introduced in the global food supply. Novel food production approaches are equally important for improving food handling and transportation practices, developing processing technologies to enhance the utilization of foods, and providing maximum nutritional benefits to the consumer. Food safety and public health protection are also a key element of emerging global food systems. The present Special Issue encourages submissions from food scientists, agri-food technologists, food product technologists, microbiologists, and nutritionists working in related fields of science.

Guest Editors

Dr. Malik Altaf Hussain

Agriculture and Food Sciences Discipline, School of Science, Western Sydney University, Sydney, Australia

Dr. Alaa El-Din A. Bekhit

Department of Food Science, University of Otago, Dunedin 9054, New Zealand

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
