Dendrochronology beyond the Ordinary: Understanding the Wood Formation and Climate Change

Message from the Guest Editors

Dendrochronology is a powerful tool that allows us to "travel" through time, providing insight into the past through information about climates, environmental changes, and key events, stored in the growth rings. Dendrochronology also provides information to decipher how plant species, especially trees, adapt to environmental changes and predict future ecosystem dynamics. Xylogensis, the intricate process of wood formation, is the fundamental substrate that underpins this chronology and gives it precision and authenticity. Through xylogensis, dendrochronology bridges the temporal divide and provides a deeper scientific understanding of our world. We are pleased to invite you to contribute to the Special Issue "Dendrochronology Beyond the Ordinary: Understanding the Wood Formation and Climate Change". The purpose of the Issue is to gather the necessary data for advancing dendrochronology and its applications. Data is not limited to dendrochronology and xylogensis but also involves the wider area of anatomical responses of wood to the environment. The collected knowledge will serve for our time travel and aid our research aiming to advance dendrochronology and its use.

Guest Editors

Dr. Angela Balzano

Dr. Maks Merela

Prof. Dr. Veronica De Micco

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
