Strategic Planning of Urban Green Space in Large Spatiotemporal Scales

Message from the Guest Editor

Urban green spaces can not only provide recreational areas for residents, but can also maintain biodiversity, mitigate climate hazards and environmental pollution. With the negative impacts of urban expansion and densification, more studies on the theories, techniques, models, and management approaches for large spatiotemporal scale green space planning are needed. We welcome papers on the following topics:(1) Spatial-temporal changes, through monitoring, analyzing, and forecasting of urban green spaces, that can support strategic spatial planning.(2) Addressing development challenges and urban issues through strategic planning of urban green spaces.(3) New methodologies, technologies, and models that can support urban green space planning on large spatiotemporal scales.(4) Monitoring or simulating the effectiveness of urban green space planning schemes across long time series.(5) Sustainable management methods used to implement strategic planning of urban green spaces. In addition, interdisciplinary investigations that address the above-mentioned fields are welcome.

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
