# Managing Indoor Wood Biodeterioration

### Message from the Guest Editors

Wood is one of the most widely used natural resources in human history for the production of not only furniture but also structural parts of buildings, religious and recreational objects, defense tools, and boats due to its high load-bearing capacity, good thermal insulation and stability, low carbon footprint, and versatility. However, the process of biodegradation introduces a challenge to its durability. All wood materials are vulnerable to physical and mechanical stresses and biotic deterioration, which can, in turn, be accelerated by extreme abiotic factors, particularly moisture. The durability of wood needs to be enhanced through sustainable approaches. We invite submissions of reports on original research and new developments in the field of wood durability mechanisms and strategies for the protection and preservation of wooden structures, wood-based building materials and wooden objects, including heritage elements, in indoor environments.

### Guest Editors

Dr. Anna Maria Vettrano

Department for Innovation in Biological, Agro-food and Forest systems (DIBAF), University of Tuscia, Viterbo, Italy

Dr. Luisa Ghelardini

Dipartimento di Scienze e Tecnologie Agrarie, Alimentari Ambientali e Forestali, Università degli Studi di Firenze (University of Florence), Piazzale delle Cascine 18, 50144 Firenze, Italy

### Deadline for manuscript submissions

closed (23 September 2024)

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
