# Influences of Climate Change on Range Limits and Distribution of Trees and Forests

### Message from the Guest Editors

Many biotic and abiotic factors drive the distributional ranges of plant species. The climatic factors, such as precipitation and temperature, significantly control the tree species. Recently, due to exposure to the consequences of ongoing weather abnormalities, the biodiversity crisis and climate change are intrinsically linked, showing unprecedented biota shifts. This accelerates the destruction of the natural world through increasing droughts, flooding, and wildfires, while the loss and unsustainable use of nature are, in turn, critical drivers of climate change and biodiversity loss. We encourage authors to focus on the distributional pattern of trees and subsequent habitats to explain the consequences of climate change on their boundary limits and ecotonal transitions.

## About the Journal

### Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

---

### Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
