Special Issue

Coastal Forest Dynamics and Coastline Erosion

Message from the Guest Editors

The aim of this Special Issue to create a collection of articles addressing the basic and applied ecology of coastal species, how they respond to changes in their habitat, and analyses of rehabilitation projects. The scope of the issue includes species commonly associated with coastal forests, the threats facing coastal forests with specific examples, and management practices used to regenerate and tend coastal forests. The types of manuscripts we are soliciting include the following involving coastal species and changes in their habitat:

- Silviculture
- Production ecology
- Ecohydrology
- Tolerance
- Restoration case studies

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
