

Special Issue

Topicalities in Forest Ecology of Seeds

Message from the Guest Editor

The gene pool of forest trees is part of the natural wealth of the environment, and is important for the future of forests in terms of the adaptability and ecological stability of forest stands. Maintaining the morphological and physiological quality of forest tree seeds is the most important condition for the possibility of successful forest reproduction. Advancing climate change, forest soil degradation and inappropriate management are weakening healthy trees, causing the forest to become less stable and vulnerable. This Special Issue will provide an overview of the most recent advances in the field of seed ecology and its applications in diverse areas, by providing selected contributions on advances in the seeds and fruits of forest species, their morphological and physiological characterization, and many related topics. Potential topics include, but are not limited to: Flowering and pollination of forest trees; Seed and fruit quality; Forest seed production; Seed dispersal; Soil seed bank; Seed germination and early seedling growth; Seed dormancy; Seed and fruit predation by animals; Perspectives in forest seed technology.

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of
Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei
Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and
other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.9 days after
submission; acceptance to publication is undertaken in 2.5
days (median values for papers published in this journal in
the first half of 2024).
