

## Special Issue

# Effects of Forest Management Practices on Bat Habitat and Community Structure

### Message from the Guest Editors

Bat populations throughout the world are declining due to multiple factors including disease, habitat loss and fragmentation, wind energy development, agricultural expansion, hunting and collection, human disturbance of roosts, urban development, and climate change. Most bats use forests or woodlands for part or all of their life cycle. Human communities throughout the world also depend on forests for their many products ranging from timber, to food, to material for handicrafts. Thus, forest management practices that meet the needs of bats and humans are required for long-term sustainability of both. Studies examining the effects of forest management practices have been increasing since the 1980s, but there are still many questions left unanswered. This Special Issue of *Forests* will focus on studies that examine the effects of forest management practices at the stand and landscape-scale on bats around the world. We invite papers that focus on a variety of bat responses that utilize field experiments as well as models of long-term effects of forest management across large landscapes and reviews of bat responses to certain silvicultural methods.

## About the Journal

### Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
