

Special Issue

Plant Diversity and Phytogeography in Forests

Message from the Guest Editor

Nowadays, many species, even common ones, can be critically endangered, resulting severe disturbance within the forests' plant communities and to the related ecological processes; thus, the maintenance of the ecological processes in forests is dependent upon the maintenance of their biological diversity, which can be translated to the maintenance of valuable Ecosystem Services. We invite researchers, stakeholders and scientists to contribute to this Special Issue, with studies from all fields, including field studies, statistical analyses, spatial distribution modeling and mapping. Our goal is to enhance the knowledge on forests' plant diversity, species conservation status, their spatial distribution and the resulting phytogeographical relations, which can be proven as valuable indicators not only for understanding the biological processes and corridors, but for providing important information for the human–forest interaction and for the challenge of the climate change tackling.

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
