Role of Gap Factors in Forest Tree Regeneration and Plant Communities

Message from the Guest Editors

Dear Colleagues, Many factors complicate harvest gap outcomes and their implementation. Past research has focused on gap size, tree regeneration, plant architecture, and plant community diversity. The results are varied and highlight the influence of gap characteristics, plant traits, microclimate, soil moisture, and biotic influences within gaps. More studies are needed to further refine these interactions by ecosystem and region. New studies are needed on functional relationships and belowground processes within gaps, gaps as small-scale plantings for new ecotypes/species for anticipated climate change, and studies that translate existing knowledge into application, such as forest canopy composition and heterogeneity to stand-scale prescriptions (e.g., using LiDAR). Implementation studies are needed to execute research results into operations. Overall, new knowledge on the context of gaps and their application will advance the knowledge and the practice of sustainable forest management. Dr. Christel C. Kern

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
