Special Issue

Population Genetic and Morphological Diversity of Woody Plants

Message from the Guest Editors

Over the last few decades, research quantifying population diversity has been intensifying, using various genetic and morphological methods. Genetics is a rapidly progressing area of biological sciences with increasing economic and ecologic relevance in forestry and biodiversity conservation over recent years. Although morphological methods were more utilized in the past, they are still often applied today in studies quantifying population diversity, especially in combination with genetic analyses. The aim of this Special Issue of Forests is to cover research that includes the application of genetic and morphological analyses in forestry and related plant sciences and pertains to the population diversity of woody plants.

Keywords

- woody plants
- trees and shrubs
- population diversity
- population structure
- biodiversity
- genetic analysis
- morphometric analysis

About the Journal

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng
Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa
Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
