

Special Issue

Recent Advances in Fractional-Order Equations and Their Applications in Modern Energy Systems

Message from the Guest Editors

The purpose of this Special Issue is to continue to provide a platform to share the insights, findings, and experiences in utilizing fractional-order equations to address the challenges and opportunities in modern energy systems. Topics that are invited for submission may include, but are not limited to, the following: Fractional-order control theory in modern energy systems; Theoretical frameworks and foundations of fractional-order equations in modern energy systems; Fractional-order modeling and analysis of modern energy systems; Fractional-order control systems and implementation of modern energy systems; Applications of fractional-order equations in renewable energy sources; Fractional-order control and optimization of energy systems; Fractional-order dynamics in energy storage and energy conversion systems; Case studies and implementations of fractional-order models in energy systems; Energy storage systems, supercapacitors and batteries, and hybrid energy storage.

Guest Editors

Dr. Zhe Gao

Dr. Xiaoting Gao

Dr. Enchang Cui

Deadline for manuscript submissions

15 July 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlo Cattani
Engineering School (DEIM), University of Tuscia, Largo dell'Università,
01100 Viterbo, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Analysis)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2024).
