

Special Issue

Blockchain and DLT Interoperability

Message from the Guest Editors

The purpose of this Special Issue is to stimulate and collect high-quality scientific papers related to the study of the problem of interoperability between blockchain and its solutions. The articles in this Special Issue are intended to serve as a resource for academics and industry in the development of new studies and blockchain applications. Topics include, but are not limited to:

- Best practices for blockchain interoperability by design;
- Performance metrics and tools for blockchain interoperability;
- Scalability solutions, sidechain systems and sharding systems;
- Blockchain-agnostic interoperability protocols;
- DLT and blockchain interoperability architectures;
- Blockchain reversibility;
- Layer 2 solutions for interoperability;
- Cross-chain transactions;
- Languages for interoperability;
- Blockchain-oriented software engineering;
- Blockchain oracles and bridges;
- Cross-chain decentralized applications;
- Applications of blockchain interoperability;
- Blockchain and DLT systems interaction.

Guest Editors

Dr. Andrea Pinna

Prof. Dr. Roberto Tonelli

Dr. Leonardo Mostarda

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari
Department of Engineering and Architecture, University of Parma,
Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Computer Networks and Communications)
