

## Special Issue

# New Developments in RFID Technologies and Applications and Their Integration into IoT

### Message from the Guest Editor

RFID, though widely accepted as an exciting technology, presents several significant design challenges and issues to engineers and researchers. These issues arise from the context-aware processing of RFID data, achieving efficient matching and read range, developing novel smart IoT-based applications, achieving smart and human interaction, and privacy and security issue of RFID data within the IoT context.

## About the Journal

### Message from the Editor-in-Chief

*Future Internet* is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q1 (Computer Networks and Communications)
