

Special Issue

Experiments on Dishonesty in Strategic Interactions

Message from the Guest Editors

The special issue “Experiments on Dishonesty in Strategic Interactions” aims to encourage submissions of experiments where dishonesty unfolds in strategic interactions, i.e., where a subject’s dishonest conduct has immediate consequences for others. Relevant topics include (but are not limited to): lying in collaborative situations and the effect of competition on dishonest behaviour. We also welcome submission of experiment where lying has no direct monetary consequences on others (e.g., payoff interdependence) but where the mere presence of unaffected observers might condition dishonesty. Examples include the role of peer pressure, reputation, observability, and accountability (whistleblowing) on lying. We accept both laboratory and field experiments, with or without monetary incentives. To promote the verifiability and replicability of empirical results, submissions should include a power analysis, and all data should be made available upon publication.

Guest Editors

Dr. Rainer Michael Rilke

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.6 days after
submission; acceptance to publication is undertaken in 3.9
days (median values for papers published in this journal in
the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
