## Pro-sociality and Cooperation

### Message from the Guest Editor

Understanding how to achieve and sustain cooperation in social dilemmas is a fundamental question in the social sciences. While a large body of literature on this topic exists, global challenges such as climate change highlight the current relevance of pro-sociality and cooperation. The Special Issue “Pro-Sociality and Cooperation” invites the submission of both empirical and theoretical papers investigating strategic and non-strategic incentives to cooperate in single or repeated interactions. Settings of interest include (but are not limited to) public goods games, prisoner’s dilemmas, trust games, and common-pool resources. Submissions reporting results from experiments should include a power analysis, and data should be made available upon publication.
