

Special Issue

Gut Microbiota-Host Interactions

Message from the Guest Editor

The crosstalk between gut microbiota (GM) and the immune system is intense and complex. When dysbiosis occurs, the resulting pro-inflammatory environment can lead to bacterial translocation, systemic immune activation, tissue damage, and cancerogenesis. The special issue aims to add and clarify some aspects of this fascinating topic.

Guest Editor

Dr. Francesca Romana Ponziani

Internal Medicine and Gastroenterology—Fondazione Policlinico Universitario Agostino Gemelli IRCCS, Catholic University of the Sacred Heart, Rome, Italy
