

Special Issue

Advances in Seismic Hazard Assessment

Message from the Guest Editors

Strong earthquakes occur on a global scale, causing numerous casualties and significant economic losses. The proposed Special Issue, entitled "Advances in Seismic Hazard Assessment", aims to present novel approaches and methods used to assess seismic hazards in different regions with diverse seismotectonic conditions and with variable levels of knowledge of seismic history and geological factors determining earthquake occurrence. The guest editors invite researchers to present research papers describing results of their studies, as well as review papers on the following topics:

- Probabilistic and deterministic seismic hazard assessment at a country or regional scale;
- Identification of causative faults / zones—basics of seismic hazard assessment;
- Site effects and their consideration for site-specific hazard assessment;
- Paleoseismology and its importance for seismic hazard assessment;
- Physically based and empirical ground motion prediction equations for seismic hazard assessment;
- Seismic scales and relationships between macroseismic intensity and ground motion parameters.

Guest Editors

Dr. Alexander L. Strom

Geodynamics Research Centre – Branch of JSC "Hydroproject Institute", 125993, 2, Volokolamsk Highway, Moscow, Russia

Dr. Alexey Konovalov

Sakhalin Department of Far East Geological Institute, Far Eastern Branch, Russian Academy of Sciences, Yuzhno-Sakhalinsk, 693023, Russia

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
