

Topical Collection

Frailty in Older Adults

Message from the Collection Editor

Social factors, such as social exclusion, inequality, and socio-economic status, are recognised as playing an increasingly important role in the health of older people. Studies have shown that when older people have less social support, adverse health outcomes are more likely to occur, including increased mortality and disability. In addition to studies of single social factors, composite measures that combine many factors, such as the social vulnerability index, could be more effective at identifying adverse outcomes due to the complex interplay between social factors and health outcomes. For this Topical Collection of *Geriatrics*, articles that examine the link between social vulnerability and health outcomes are welcome, particularly articles of longitudinal studies and those including clinical assessment of social vulnerability. Submissions can include both reviews and original research.

About the Journal

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Editor-in-Chief

Prof. Dr. Ralf Lobmann

Department of Endocrinology, Diabetology and Geriatrics, Clinical Centre Stuttgart - Katharinenhospital, Kriegsbergstrasse 60, D70174 Stuttgart, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

CiteScore - Q2 (Health (Social Science))
