

Special Issue

Tailored Lifestyle and Behaviour Change Interventions for Prevention of Diabetes

Message from the Guest Editor

LMICs have various levels of socio-economic inequalities, social ills, varied cultures, and food and physical environments, which bring with it unique challenges when trying to apply evidence from high-income countries without adaptations. We are pleased to invite you to contribute to this Special Issue, which aims to focus on highlighting findings from lifestyle interventions from LMIC to serve as a platform to showcase and learn from unique environments and contexts. This Special Issue aims to collate manuscripts that will highlight the challenges related to changing health-related behaviour in poorly resourced settings. Endeavouring to change individuals' daily practices by influencing their attitudes and beliefs to prevent disease is a complex task as it includes a vast array of socio-cultural determinants. Thus, learnings from various settings would enrich scientific understanding and contribute to intervention implementation in resource-poor settings positively. In this Special Issue, original research articles and reviews are welcome to be submitted.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Care Sciences and Services) / CiteScore - Q2 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
