Special Issue

Analysis of Healthcare Big Data and Health Informatics

Message from the Guest Editors

Health informatics and the analysis of massive data in the health field through techniques related to artificial intelligence are helping to create new procedures and applications. This Special Issue calls for manuscripts addressing health big data analysis and health informatics topics. Papers that address knowledge engineering issues are welcome.This Special Issue aims to provide an up-to-date overview of health informatics techniques applied to different public health problems, as well as the use of artificial intelligence on large amounts of data to help improve, among other things, the prediction and diagnosis of diseases or the improvement of public health.health informaticseHealthknowledge engineering in healthcareknowledge graphs in healthcareknowledge extraction and representation of health-related topicsartificial intelligence in healthcaremachine learning in healthcaredeep learning in healthcaredata analysis in healthcare data

MDPI

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

High Visibility:
indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:
JCR - Q2 (Health Care Sciences and Services) / CiteScore - Q2 (Leadership and Management)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
