

Special Issue

Heritage Tourism and Sustainable City Dynamics

Message from the Guest Editors

Heritage visits represent one of the main drivers of the dynamics of historic centres and the development of conservation, safeguarding, and sustainability of the heritage in these places. We have witnessed a profound regeneration of the landscape of historic cities and a greater concern for the conservation of the historical heritage, resulting from successive dynamics that promote heritage visits and tourism development. At the same time, the dynamics surrounding historical heritage can also constitute risks if there is no concern for the balance between visits and the protection and safeguarding of the heritage. It is therefore necessary to identify the main risks inherent in heritage tourism and to identify cases, methodologies, and strategies that promote the sustainable use of cultural heritage and its constant surveillance. There is still a scarcity of scientific literature on these and other related topics. With this Special Issue, we aim to fill these gaps by encouraging researchers from different areas to explore the possibilities of research on these themes in a multidisciplinary, interdisciplinary, diachronic and/or synchronised, and transversal way.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Naples, Italy

Dr. Nicola Masini

CNR-IBAM, 85050 Baragiano Scalo, Italy
