The Sands of Time—3000 Years of Human Activity at Saqqara, Egypt

Message from the Guest Editor

The site of Saqqara, Egypt provides evidence for 3000 years of continuous funerary activity with human burials of all social groups, including royalty, the nobility and ordinary people. It is the site of the world's oldest stone funerary complex—Djoser's Step Pyramid. The site provides the unparalleled opportunity to chart human burial practices from the 1st Dynasty through to the advent of Christianity in Egypt. It is the home of the Serapeum, the burial catacomb of the cult Apis bulls, as well as the largest of Egypt's known animal necropolis, where millions of animals were deposited as votive offerings. This Special Issue will investigate the site and its wealth of material culture.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Naples, Italy

Dr. Nicola Masini
