

Special Issue

Opportunities and Challenges of Urban Horticulture

Message from the Guest Editor

Urban agriculture provides about 10% of the global food supply and is becoming an integral component of urban planning policies thanks to its multifunctional role. Urban agriculture can contribute to the social, environmental, and economics pillars of sustainable city development. However, the soil, water, and air quality of urban areas may pose serious limitations (contamination by pathogens, inappropriate use of pesticides, high occurrence of insects/disease vectors, contamination of soil and products with heavy metals, etc.) which should be taken into account to avoid threat to public health. This Special Issue aims to provide insights into the opportunities and challenges of urban agriculture for sustainable city development. Your contribution to this topic through literature reviews or original research papers that deal with urban horticulture is welcomed. I look forward to the opportunity to receive your manuscripts and share interesting outcomes with the community of scientists, students, technicians, and professionals that work in the horticultural sector.

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis

Department of Biological and Environmental Sciences and Technologies, Università del Salento, Centro Ecotekne, via Provinciale Lecce Monteroni, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q2 (Horticulture)
