

Special Issue

Health Promotion in the Workplace

Message from the Guest Editors

This Special Issue will update the programs of prevention and protection in the workplaces to defend workers from generic and specific problems encountered in the workplace. What research has been conducted to ensure that each worker goes through the working day pleasantly without having to run into systematic problems that may in the long term cause them a disorder or even a pathology? Are there specific new work-related disorders that need to be addressed by the scientific population? These are the questions we would like to ask the audience of colleagues who deal with this delicate area of research with the aim of integrating the topics of occupational medicine and having a range of tools that can be used when the situation requires it.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
