

## Special Issue

# Food Science and Human Nutrition

### Message from the Guest Editors

We are glad to present this Special Issue on Food Science and Nutrition in the *International Journal of Environmental Research and Public Health*. This Special Issue aims to publish novel and original research on the conjunction between food science and nutrition, considering in vitro, in vivo, and clinical studies with a major focus on the impact and interaction of the food matrix in nutrition. We welcome contributions in the form of research articles, reviews (literature reviews, mini-reviews, or systematic reviews), or meta-analyses considering topics such as:

- Molecular mechanisms of food components within a food matrix.
- Bioaccessibility, bioavailability, and bioactivity of food components and their relationship with nutrition.
- Impact of food components in a food matrix in models of disease.
- The effect of food technologies on the transformation of food components and their impact on nutrition.

---

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
