Special Issue

Burden of Cancer Treatment

Message from the Guest Editor

There is an imminent need to compare the utilization of cancer treatment internationally as well as domestically based on quantitative (using panel data to compare utilization of cancer treatment based on disease status or demographic characteristics or comparing prices and volumes of drugs internationally) or qualitative (such as focused group interviews among various stakeholders) assessments. This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) highlights end-of-life care and cancer drugs. New research papers, reviews, case reports and conference papers are welcome to this issue. Other manuscript types accepted include methodological papers, position papers, brief reports and commentaries. Keywords oncology drug; administrative claim database; international comparison study; biologics; biosimilars; health care utilization; cancer care; end-of-life cancer; health insurance; chemotherapy: Korea

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251. USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
