

## Topical Collection

# 2nd Edition of Achieving Environmental Health Equity: Great Expectations

### Message from the Collection Editors

It has long been obvious that environment and human health are intricately linked. These disparities are heavily influenced by socio-economics, geography, occupation, government policies, and many other exacerbating factors. Funding agencies have recognized the importance of addressing health disparities in improving community and population health. However, how does this help us to achieve environmental health equity, and is this even remotely possible? The premise of this topical collection is that we can do more to move closer toward environmental health equity through reducing disparities, and that there are many “lessons learned” to be shared by and with communities that face these disparities—urban, peri-urban, and rural. Invariably, these “lessons” are community-driven, and therefore, community leadership and engagement should be a major focus in addressing health disparities. Papers describing studies in which community–academic partnerships reduce environmental health risks in sustainable ways are encouraged, but also research that realistically outlines the challenges community–academic collaborations are facing is welcome.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
