

## Special Issue

# Epidemiology of Occupational Health

### Message from the Guest Editor

Epidemiology is one of the pillar in occupational health research. In this special issue, we encouraged papers on methodology in occupational epidemiology, studies from low-income countries and emergent topics as migrant's workers, transport workers health (especially maritime workers). Studies with longitudinal follow-up, systematic reviews with meta-analysis and protocol of systematic reviews are welcomed. We intend to make editorial decisions that will reflect the soundness of papers and impact on legal and prevention policies, risk and health prevention. We will accept manuscripts from different disciplines including global health, epidemiology, Toxicology, health disparities including but not limited to disparities in access to healthcare, exposure assessment, intervention studies, risk, and health impact assessment. This Special Issue calls for original contributions exploring the following topics: Occupational epidemiology, Occupational toxicology, Maritime Workers, Methodology in occupational epidemiology, Risk assessment, Low-income countries, Emergent risks

### Guest Editor

Dr. David Lucas

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
