

## Special Issue

# Promotion of Care and Psychological Well-Being for Healthcare Workers

### Message from the Guest Editors

Mental health and well-being are among the most important areas that the WHO is focusing on to enhance the quality of life of individuals (WHO, 2022). To achieve this, it is necessary to develop innovative strategies and plans that can help accomplish this objective. In this Special Issue titled "Promotion of Care and Psychological Well-Being for Healthcare Workers", for which I have been invited as a guest editor, there is a significant opportunity to share the research experiences of all professionals involved in mental health, including those who promote psychological well-being and care for healthcare workers. In doing so, we can communicate and disseminate solutions and analyses derived from science and research for the benefit of humanity. We invite you to submit your studies, whether in the area of quantitative research, qualitative research, or systematic scientific literature reviews, including meta-analyses.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
