

## Special Issue

# Testing and Physical Conditioning for Tactical Populations

### Message from the Guest Editors

We invite you to submit critical reviews and original research for a Special Issue on tactical populations. In this instance, tactical populations include those serving in military, paramilitary, law enforcement, fire and rescue, and paramedical occupations. Submission of papers that underpin the health and safety of tactical populations, and therefore the public that they serve, are welcome. Topics may focus on the recruitment, retention, and rehabilitation of tactical personnel across their occupational lifespan (from initial training through to retirement). We thank you for considering this invitation and are available for any inquiries. Prof. Rod Pope

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
