

## Special Issue

# Vaccination Effectiveness, Attitudes and Adherence among Women

### Message from the Guest Editors

Vaccination is one of the most important public health measures that have contributed in past centuries to improve duration and quality of life. Vaccination adherences, however, are under recommended levels to reduce the spread of vaccine preventable diseases (VPDs) in several countries worldwide. Vaccination coverage rates are low due to misconceptions or doubt regarding the effectiveness and safety of vaccines, causing the “so-called” phenomenon of vaccine hesitancy. Furthermore, during the last decade, vaccination against influenza and pertussis among pregnant women has been one of the most important public health topics, demonstrating high efficacy and contributing to meet the concerns of vaccination safety. This Special Issue encourages the submission of original articles, systematic reviews or meta-analyses, short communications, and other types of manuscripts that can improve knowledge on vaccine effectiveness, right attitudes, and strategies that can increase vaccination adherence among women.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
