

Special Issue

Workplace Health and Wellbeing during and beyond COVID-19

Message from the Guest Editor

This Special Issue will consider the relationship between the COVID-19 pandemic and the physical and mental wellbeing of employees and trainees; experiences of particular occupational groups and sectors (including students in higher education as the future workforce); psychosocial risk factors; organisational interventions for workforce support; the engagement of line managers in workplace health initiatives, promoting healthy lifestyles at work; digital approaches to supporting employee health and wellbeing or facilitate pandemic-related shifts to remote working; and the prevention or management of chronic conditions at work and issues of equality, diversity, and inclusion in the context of COVID-19. In particular, we welcome articles on the implementation and effectiveness of interventions to mitigate the impacts of the pandemic. This may include the experiences and outcomes of workplace SARS-CoV-2 testing and vaccination programmes, and supportive interventions to mitigate the impacts of COVID-19 on the mental and physical health of the current and future workforce.

Guest Editor

Prof. Dr. Holly Blake

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
