

Special Issue

Environmental Management and Pro-Environmental Behaviors

Message from the Guest Editors

The world is currently facing increasingly serious environmental problems such as climate change, rapid deforestation, and land desertification, which are seriously troubling and threatening human life and health. Countries around the world continue to set new demands and goals for environmental issues, making environmental sustainability one of the most central challenges faced by the global community. In response to this challenge, the participation of all sectors of society is required. This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on environmental management and pro-environmental behaviors. In this Special Issue, we will accept manuscripts from different disciplines including environmental science, ecology, management, psychology, behavioral science, and other social sciences. New high-quality original research articles (quantitative and qualitative) or systematical reviews are welcome for submission to this Special Issue; papers dealing with new approaches to behavioral and environmental management are also welcome.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
