Special Issue

Anthropocene Challenges: Exploitation of Resources vs. Preservation of Natural Systems

Message from the Guest Editors

Twentieth-century human development has brought the Earth into a new epoch that has been defined by many researchers as the Anthropocene. In the Anthropocene, scientists have to face a new and challenging problem: How to support human well-being without compromising the Earth's capacity to provide the resources that human societies need. A pivotal role for this aim is played by the geo scientists involved in deepening the knowledge of our, and other, planets. This Special Issue focuses on:

- Soil/water management and quality
- Heavy metal pollution, remediation, restoration
- Cohabitation with heavy metals anomalies
- Circular economy: re-utilization of wastes
- New ore deposits and geo-resources
- Renewable energy sources
- Urban geology, smart cities and health
- Environmental resilience

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251. USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
