

## Special Issue

# Advances in Communication and Public Health

### Message from the Guest Editors

Despite great improvements in public health worldwide during the last decades, much still remains to be done in terms of making our society healthier. As different people have different health needs, we have to prepare and adapt health interventions accordingly, taking into consideration that many aspects of health are intertwined in multifaceted social spheres. Hence, communication has become a key protagonist in public health; therefore, the purpose of this Special Issue is to stimulate the field of public health communication, and to eventually add value in our everyday understanding of health and healthcare. This Special Issue offers an opportunity to publish high-quality interdisciplinary research and reviews that report on the wide range of topics related to public health and communication. We welcome manuscripts .

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
