

Special Issue

Impact of COVID-19 on Older Adults' Lifestyle and Healthcare

Message from the Guest Editors

The COVID-19 pandemic has significantly impacted all aspects of everyday life, in particular several issues related to healthy ageing. This special issue focused on “Advances in Socio-Economic Research on Ageing” research papers on the various aspects related to the COVID impact, such as:

- Formal and informal caregiving relationship on the caring role and the relationship between caregiver and care recipient;
- Relationship in the residential care home, in particular socialization among the residential patients and between the residential patients and their family members or parents who lived outside;
- Life of the older people during the COVID
- Perceptions, expectations and experience of older adults after the COVID restriction
- Consequences of the isolation, due to the lockdown, and of the sedentary lifestyle and their impact on the older people
- Physical activity intervention for elderly during lockdown, the evaluation of remote technology
- Developing possible Physical Activity and Exercise guidelines for elderly people recovering from COVID
- Older adults' adherence to physical activity interventions during lockdown

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief
