

## Special Issue

# Emerging Topics in Environmental Justice

### Message from the Guest Editors

Environmental Justice (EJ) research seeks to document and address the adverse and disproportionate environmental health and risk burdens associated with multiple dimensions of social inequality. Although its initial focus was on anthropogenic pollution, the scope of EJ research has expanded to encompass many other issues such as natural disasters, resource depletion, energy use, consumption patterns, food systems, climate change, and government policies that adversely affect the environment and health of particular social groups. This Topic Collection provides a forum for conceptual, methodological, and empirical scholarship on EJ. We welcome original case studies, literature reviews, critical evaluations of methodologies, and discussions of future research or data needs that focus on any aspect of EJ analysis, activism, and/or policy. Paper topics may include, but are not limited to, the following issues: anthropogenic hazards; natural disasters; environmental health outcomes; environmental amenities; environmental policies; climate change; food and agriculture; mining and resource extraction; water pollution and scarcity; and transportation.

### Guest Editors

Prof. Dr. Jayajit Chakraborty

Dr. Sara E. Grineski

Prof. Dr. Timothy W. Collins

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
