

## Special Issue

# Epidemiology and Public Healthcare Systems during COVID-19

### Message from the Guest Editors

Around two years have passed since coronavirus disease 2019 (COVID-19) emerged, having an unprecedented impact on humanity. Epidemiological implications and the responses of public health systems to COVID-19 vary at the national, regional, and local level. Sharing and discussing individual experiences will add knowledge to current evidence and is significant for better understanding and surpassing challenges of the pandemic. In this special issue “Epidemiology and Public Health Systems during COVID-19” of the International Journal of Environmental Research and Public Health, we welcome you and your colleagues to submit manuscripts including articles, short communications, and reviews, addressing epidemiology and public health systems. Possible themes range, for example, from the epidemiological impact of COVID-19, contact tracing, and active surveillance to transmission dynamics, surge and decline, characteristics of SARS-CoV-2 variants, public health response and intervention, and implications on public health systems. We look forward to receiving your contributions on COVID-19 research.

### Guest Editors

Dr. Tsuyoshi Ogata

Itako Public Health Center of Ibaraki Prefectural Government, Itako 311-2422, Japan

Prof. Dr. Hideo Tanaka

Public Health Center of Neyagawa City, Osaka 572-0838, Japan

Prof. Dr. Koji Wada

Department of Public Health, Faculty of Medicine and Graduate School of Public Health, International University of Health and Welfare, Ohtawara 324-8501, Japan

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
