

Special Issue

One Health Including and Beyond Zoonoses

Message from the Guest Editor

This Special Issue prioritizes zoonoses, while still exploring other multidisciplinary aspects beyond zoonoses, to comprehensively cover zoonotic and non-zoonotic components of the animal–human–environmental health relationship. We welcome manuscripts from different disciplines, including medicine and public health, veterinary medicine and public health, epidemiology, policy analysis and implementation science. Topics of interest include:

- Prioritization of control of zoonoses in One Health approach;
- Genomics in One Health
- One Health and non-communicable disease/conditions in humans and animals;
- One Health and planetary health/ climate change;
- One Health and the Sustainable Development Goals;
- Policy framework for global/regional/national/sub-national programs of One Health;
- One Health education and curriculum development in high-income and low-to-middle-income countries;
- One Health and health inequity;
- One Health approach to food security and safety;
- One Health for animal welfare and human wellbeing.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief
