

Special Issue

Maternal Perinatal Mental Health

Message from the Guest Editor

This Special Issue will focus on women's mental health at two important periods in their lives: pregnancy and postpartum. Therefore, we are seeking high-quality contributions on themes relating to perinatal mental health. Research on the topic includes prevalence, screening and diagnostic instruments, comorbidity, associated and/or risk factors, effects or consequences, and interventions. This Special Issue will interest researchers and practitioners in mental health, maternal and child health, women's health, obstetrics/gynecology, and pediatrics. I hope that this Special Issue will also encourage healthcare professionals to be more aware of the importance of this issue, screen for prenatal and postpartum depression or anxiety, and learn about mental-health resources available in their communities. I invite those of you working in this area to submit articles on themes relating to mental health in pregnancy and postpartum. Keywords: Perinatal mental health; Perinatal depression/anxiety; Assessment tools; Epidemiology; Perinatal mental health and tobacco/alcohol consumption; Risk factors; Effects; Prevention; Treatment

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
