

## Special Issue

# Advances in Biological and Chemical Removal of Heavy Metals from Water

### Message from the Guest Editor

A great deal of heavy metal-contaminated industrial wastewater is produced worldwide, and most of these heavy metals are discharged into water environments. Untreated or substandard discharge has caused serious water pollution and threatened ecological environments and human health. Therefore, it is very important that heavy metals are effectively removed from industrial wastewater using biological and chemical approaches before being discharged into water environments. In addition, the purification of heavy metal-contaminated water bodies using appropriate technologies should also be paid more attention for reducing the accumulation of heavy metals. Thus, I hope that the related researchers can provide excellent research findings about heavy metal removal from water through basic studies or engineering practice. This Special Issue focuses on the current state of knowledge on technology development and application of heavy metal removal from water. New regular research papers, reviews and engineering case reports are welcome to this issue. Excellent conference papers about this topic are also welcome.

### Guest Editor

Dr. Guohua Liu

School of Environment and Natural Resource, Renmin University of China, 59 Zhongguancun Street, Beijing 100872, China

### Deadline for manuscript submissions

closed (28 February 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
