

Special Issue

Stress, Prevention, and Resilience among First Responders

Message from the Guest Editors

This Special Issue aims to provide the readers with valuable information with regards to the multidimensional nature of stress among first responders. In addition, some papers in this Special Issue will focus on resilience and the exploration of how resilience can be studied in first responders; in addition, the application of resilience promotion interventions will be studied and discussed in some of the manuscripts included in this Special Issue. Moreover, the current Special Issue encompasses the term “prevention” to emphasize the important role of prevention or preventative interventions in helping first responders cope with efficiency in the exposure to challenges they experience in the line of duty. All scholars whose work focuses on this present topic are more than welcome to submit their manuscripts for peer review.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
