

Special Issue

Understanding Cardiovascular Disease: Causality, Pathogenesis, Prevention, and Treatment

Message from the Guest Editor

This Special Issue of the *International Journal of Environmental Research and Public Health* (IJERPH) focuses on the current state of knowledge on causality, pathogenesis, prevention, and treatment of cardiovascular disease. New research papers, reviews, case reports, and conference papers are welcome to this issue. Other manuscript types accepted include methodological papers, position papers, brief reports, and commentaries. In this Special Issue, we are especially interested in articles with potential topics of interest including:

- Inflammation and cardiovascular disorders;
- Extracellular vesicles/exosomes: role in cardiovascular diseases;
- Cardiometabolic disorders: impact of obesity;
- Arterial stiffness and cardiovascular risk and therapy.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
