

Special Issue

Advance Geospatial Artificial Intelligence for Landslide Modeling, Prediction and Management

Message from the Guest Editors

Landslides are still one of the most destructive natural hazards worldwide, causing tremendous damage and fatalities each year. This Special Issue encourages authors to share recent advances in landslide modeling, prediction, and management, with an emphasis on issues addressed by means of advanced geospatial artificial intelligence. This is an emerging scientific multidiscipline that combines innovations in geospatial technology, remote sensing, UAV photogrammetry, advanced artificial intelligence techniques (i.e., deep learning), data mining, hybrid and ensemble techniques, meta-heuristic optimization, and high-performance computing to extract knowledge from geospatial data. We kindly invite the scientific community to contribute novel and original research to this Special Issue addressing at least one of the following topics:

Guest Editors

Prof. Dr. Dieu Tien Bui

Geographic Information System Group, Department of Business and IT, University of South-Eastern Norway, Notodden, Norway

Dr. Endre Før Gjermundsen

Geographic Information System Group, Department of Business and IT, University of South-Eastern Norway, Notodden, Norway

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
