Geo-Information Science in Planning and Development of Smart Cities

Message from the Guest Editors

Cities represent the major factor of human footprints on the Earth, with the majority of people today living in cities and urbanized areas. Geographical data and information are today widely spread and available, and their production runs at an unprecedented speed. These two considerations represent the starting point for reflecting about cities, urbanized territories, and the relations with the surrounding and neighboring territories. Humans—and their machines—produce geographical data that can be used to study territories and obtain information to propose solutions for spatial issues. In such a direction is also the current debate on Smart Cities and on the technological solutions that can be used to tackle human needs and to support smart collaborative design and decision making in urbanized environments.

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
