

## Special Issue

# Earth/Community Observations for Climate Change Research

### Message from the Guest Editor

Numerous climate change extremes have devastating impacts on human societies, societal and physical infrastructure and the natural environment. This Special Issue aims to explore, analyze and discuss various impacts of climate change on social communities, public health, environmental and ecological systems, and/or infrastructures from scientific perspectives, through earth and community observation data. We invite you to contribute to this issue by submitting comprehensive reviews, case studies, or research articles that focus on scientific methods and innovative statistical analyses. Please feel free to inform us about your tentative paper title upon your interest and prior to your final submission.

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
