Spatio-Temporal Models and Geo-Technologies

Message from the Guest Editors

Over the past few years, several theoretical spatiotemporal models have been successively proposed for a better representation of geographical phenomena. From early GIS modelling approaches, a series of extensions have been suggested to integrate time within object-based, field-based and dual representations of geographical data, while a series of formal qualitative approaches have also contributed to more fundamental frameworks that support advanced spatial reasoning capabilities. Meanwhile, many successful environmental and urban GIS research studies have demonstrated that the temporal dimension can be implicitly integrated by different representation and analytical frameworks. This Special Issue is calling for innovative works that integrate the spatial and temporal dimensions within theoretical, formal and practical GIS solutions as well as urban and environmental applications that demonstrate a sound integration of the spatial and temporal dimensions. About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
