

## Special Issue

# Latest Treatment Strategy for Neurological Disorders

### Message from the Guest Editor

For this Special Issue titled “Latest Treatment Strategy for Neurological Disorders”, we are looking for original research articles and state-of-the-art reviews on preclinical and clinical therapeutic approaches, both in common and rare neurological diseases, focused on a molecular point of view. In recent years, basic researchers and clinicians have worked together, sharing research projects and planning clinical trials, to improve this scenario, with results leading in some cases to a real therapeutic revolution, such as in spinal muscular atrophy (SMA). Important therapeutic advantages have also been achieved in other rare neurological pathologies both of genetic and autoimmune etiology. At the same time, innovative approaches have changed the therapeutic options for common neurological diseases, such as migraine. Finally, an increasingly accurate metabolic–molecular characterization of hereditary and acquired neurological disorders (e.g., mitochondrial diseases, multiple sclerosis, neurodegenerative diseases of the central nervous system and movement disorders) is defining new therapeutic perspectives, sometimes unexpected.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
