

## Special Issue

# Molecular Insights into RNA Diseases

### Message from the Guest Editor

In higher eukaryotes, a variety of RNAs are transcribed from genomic DNAs. The transcribed RNAs are subjected to many editing processes, followed by transport and eventual translation, often with degradation processes. These processes are rigorously regulated, and their defects and malfunctions often result in human diseases, which are called 'RNA diseases'. It is very important that the successfully uncovered molecular mechanism is a first critical step for the therapeutic approaches to serious diseases. As the of this Special Issue titled 'Molecular Insights into RNA Diseases', I welcome submissions from many researchers working on various RNA diseases that are caused by any kinds of defects in RNA metabolic processes. The highlight of this topic is the crucial link between basic science elucidating the molecular mechanism for RNA regulation and the applications in the therapeutic approaches for RNA diseases. Articles from investigators studying the potential role of non-coding RNAs in diagnosis are also very welcome. The format of submission in this topic includes original research articles, reviews and methodology articles.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
